Dear Hiring Manager,

You are looking for a an addition to your team and I am looking an exciting new opportunity. I have great love and passion for what I do, but I am moving closer to family due to the isolation my family felt during the pandemic. I spent the last 8 years testing and programming for the system that I operated while in the US Navy and would love the opportunity to expend that same energy working for this company.

My experiences during Submarine Qualifications and my Engineering career has shown me the value in the following qualities:

**Level of Knowledge:** I strive to learn everything I can about the system/programs I work with so I can use that knowledge to provide the best service possible whether that is keeping a ship afloat or ensuring product excellence.

**Self Improvement:** I taught myself to code in C, C++, Java, KSH/BASH, and python.

**Team Player:** At the end of the day it is the team that works well together and backs each other up that succeeds.

**Leadership:** As a Leading Petty Officer I managed the timely maintenance and operation of my division. As an Agile Product Owner, I guided the team to providing a great product to our end user. As a member of all teams I have been in, I provided mentorship.

**Pride of Service:** Whether it is being a parent, a Submarine sailor, a programmer, or a tester I take great pride in everything that I do because what I do today shapes the future. I strive to make my legacy something of which I can look back on in pride.

If these qualities sound like a match and the position allows for teleworking 75%-100% of the time, then I believe I will be a great fit for your team and look forward to hearing from you soon. The best way to contact me is by phone/text or email.

Thank you for your time and consideration.

v/r
